Marshall, MI

The whole motivation behind Common Core is to dumb down America's children so they will accept a left-wing view of America and its history.

its indoctrination!
Hence, Common Core doesn't teach children how to read or write in cursive; then they won't be able to learn the truth by reading our country's founding documents. Neither will they be able to read letters from their grandparents who have written about how things were when America was free.

I hope you have read Senator Pat Colbeck's excellent evaluation of the Science and History standards which the state board of education voted in. I don't know how many of them even read it before they voted but I heard the oldest member of the board say, during their discussion time, that she hadn't even read it!

Why not choose the BEST educational standards for Michigan's children, to replace Common Core?
